Marine Corps League National Rifle/Pistol Team(s)

Over the past year the Marksmanship Committee has worked very hard to establish an official National Shooting Team. We have done so and have acquired several companies to sponsor MCL Shooting. The Marksmanship Committee will oversee and manage the National Team, interest in shooting on one of the National Teams should be directed to the Chairman or Assistant Chairman. More information to come in the soon to be released **MCL Marksmanship S.O.P.** but the teams will be based on a tryout/qualification basis and will have additional costs and commitment to shoot in the National NRA/CMP Matches.

Team and Individual Classifications

- Both Pistol and Rifle teams will be classified as High Master, Master, Expert, Sharpshooter, or Marksman according to the competitors on the team.
- Teams are classified by calculating the team average based on the classification of each firing member of the team. To calculate the team's average a numeric representation of each classification is used, and the team classification is the sum of the team member's classifications divided by the number of firing members of the team. Any decimals of .5 and greater will place the team in the next higher class.

Master 4

Expert 3

Sharpshooter 2

Marksman 1

- First time competitors that are not NRA Conventional Pistol or High-power Rifle classified will be assigned a Master classification which will be used for the current match and will be reclassified after the current year's match to their new Marine Corps League Classification.
